Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22 and 54-59, drawn to a method and apparatus for incubation of a sample, classified in class 436, subclass 45.
- II. Claims 23-38, drawn to an incubator having a plurality of circumferentially defined load stations, classified in class 422, subclass 64.
- III. Claims 39-53, drawn to a clinical analyzer, classified in class 422, subclass 68.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a ring assembly having a plurality of circumferentially defined load stations is not required. The subcombination has separate utility such as a device to manipulate samples in an automated environment.

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I, II do not require the analyzer of invention III. Further, inventions I, II have the function of incubation whereas invention III has the different function of analysis.

Art Unit: 1743

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
